ADVANTAGES

of the

NORTHROP LOOM

TRADE-MARK REGISTERED

OVER
THE COMMON LOOM

A saving of 50 to 75 per cent. in the labor cost of weaving

Increased product per loom

Superior quality of cloth

Full product under conditions that would involve large curtailment in a common loom mill

Weavers learn to operate Northrop looms in much less time than common looms

DIRECT WARPER FOR LARGE BEAMS

This warper will make four warps at one time on beams seventeen inches in diameter and six inches wide, a less number on wider beams.

The driving heads are driven independent of each other, one can be stopped, turned back to find a broken end without interfering with the others.

It can be stopped and started slowly by hand or foot, from front, back or side. It has a variable speed.

It has a short traverse motion for the warp to keep the ends from piling up in ridges. A comb reed can be used.

Price \$450.00 F. O. B. Paterson

Sargent Wool Preparatory Machinery

The Model 34 Wool Washing Machine gives you confidence in your scouring room for Quality and Quantity production. One of the important features in this model: it is so designed that the liquor is constantly clarified in both the bowl and settling tank.

Sargent Dryers built in accordance with approved drying practice. They dry by air circulation, preserving the natural softness and composition of the fibre. They operate with lowest steam and power consumption.

Wool Washing, Drying, Burring, Dusting, Carbonizing Machinery, Cotton Dryers, Yarn Conditioning Machines, Back Washers, Automatic Feeders, Wool Openers, Automatic Bagging Machines.

Perkins' Profit Promoters

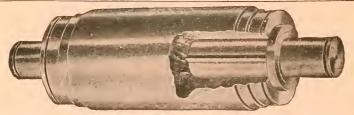

1. The U.S. Government adopted Mullen Testers 2. The R. R. Freight Classification Commit-tees adopted Mullen Testers as their stand-ard. Every fibre case

shipped bears a stamp to show that it will stand "a resistance ofpounds to the sq. in. [Mullen test]."

Ask for descriptive matter and names of

TEXTILE MILLS

using the Jumbo Mul-len Tester

Perkins Guaranteed Calendar Rolls

For Finishing Textile Goods, Bleaching and Dyeing Cloth, etc.,

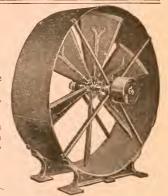

are filled by a patented mechanical process, which insures perfect uniformity in density, a feature which is impossible with the ordinary hand-made rolls. The line includes: Paper Rolls, Ilusk Rolls, Cotton Rolls and Combination Cotton and Husk Rolls. All are fitted with Perkins' Patented Spline, which prevents slipping or turning around the shaft.

For All Mill Needs-Get A Perkins Ventilating Fan

It is Superior Because:

- (1) The frames, drums, arms, shafts, etc., are STEEL-not iron.
- (2) The blades are adjustable—can be set to any angle-to blow in or out.
- (3) It can be run at high speed—and will run longer without oiling than any other fan on the market—on account of the self-oiling journal boxes.

Power Transmission Systems built and installed for driving any fan in any position.

BOARD OF TRADE BUILDING

BOSTON, MASS.

Most efficient and best equipped boiler and steel plate construction plant in the east. Two railroad sidings direct into shops. This is what one of our Customers thinks of our Service

The Flat Steel Heddle Universal Frame

Are playing today a very prominent part in the efficient running of looms

A LARGE percentage of Manufacturers realize the great importance of the Steel Heddle—the heddle punched from *flut cast steel*—with the round cornerless eye, that cannot catch, rub or chafe or pull the Warp Thread—the heddle that adjusts itself automatically on the frame—the heddle that cannot twist or bend while at work.

THE UNIVERSAL FRAME

is used in hundreds upon hundreds of Textile Mills. Why? Because it is built for service—for efficiency—for durability. It is built for real economy—not the fake economy of an original low price. You can have the *Universal Frame* built to fit the peculiar conditions of your mill and your product.

COTTON, SILK, WORSTED OF WOOL THERE IS A HEDDLE AND FRAME FOR THE WORK

From fancy cotton shirtings to canvas—from narrow fabrics to broad silk—from light worsteds to heavy woolen cloths, there is a heddle and frame for your particular kind of work.

We are manufacturers of the best doup heddle the market ever produced. We are makers of the best finished drop heddles and wires you ever had in your mill.

The "Made in America" cast steel Reed Wire, which has created quite a sensation, for all kinds of Reeds, is made in our plant.

These are facts. Their efficiency has been proven so often that the novelty is lost. Do you want a list of users in your particular line? Write to these people yourself. They'll tell you what Steel Heddle Equipment has done for them.

STEPHENSON

Bar Belt Dressing Prevents

Waste of Power and Fuel

Because it stops the belt from slipping and causes it to transmit all the Power without being made so tight as to cause unnecessary friction.

This Registered Trademark
Is Your Protection

It appears on each stick of Genuine Stephenson Bar Belt Dressing—the dressing that has held to its uniform

quality for 30 years.

This belt dressing surpasses liquid preparations, for there is absolutely no waste in applying it to the belt, and it is put up in sticks or solid form, so that it can be carried about in the tool-box. For these reasons—

1 Pound Lasts as Long as 2 Pounds of Any Liquid or Semi-Liquid Dressing.

There are two brands, Red Label for leather belts, Green Label for rubber, canvas, or balata belts.

Commission Work

TEXTILE WORLD JOURNAL has established a separate department in the paper for the advertising of mills seeking Custom, Contract and Commission Work of all kinds. When men have work to be done they consult this list for mills to handle it. You will find the mills who advertise in this department of TEXTILE WORLD JOURNAL reliable and progressive.

Mills equipped for this character of business should consider the matter of permanent representation in TEXTILE WORLD JOURNAL. They will find it a business investment which will yield big returns.

MILLER PRESS & MACHINE COMPANY
JOSEPH J. SCHOLFIELD

Diamond-Fibre Roving Cans

HESE cans are exceedingly strong, tough, and durable. The interior surface is smooth. They are of true diameter; the bottoms are hard wood, accurately placed and balanced—thus the cans revolve truly. As the color is IN the fibre and not painted ON it, the cans can never become unsightly from

accidental chipping and rubbing.

Diamond Fibre Boxes, Baskets, Barrels, Doffing Cars, Trucks, etc., are identical in workmanship and material as the Roving Cans. In addition, the top edges of the boxes, baskets, barrels and trucks are bound with metal and in such manner as to produce absolute smoothness. The bottoms of the barrels are of hard wood.

Prices and full information con-cerning all these specialties sent on request.

Diamond State Fibre Company

Bridgeport, Pa. (Near Philadelphia) Offices in Principal Cities

Steel Package TRUCKS

Light steel bodies

Smooth hardwood straps. bottoms and partitions

Metal corner reinforcements

In sizes to exactly meet your requirements.

Of substantial construction; will be as good for service 10 years from date of installation as at time of purchase.

Perfectly smooth inside and out, eliminating danger of damage to textiles by catching on burrs or rough places.

Buyers' Index FOR

Machinery and Mill Supplies

The following Classified Index of Advertisers in this Directory contains the names of nearly all the principal builders of Textile Machinery and Dealers in Mill Supplies. The advertisements of these concerns can be found by referring to the Alphabetical Index to Advertisers, Page 101. Any buyers who are unable to find in this index the machinery or supplies desired, are invited to communicate with the publishers, who can in all probability refer them to the proper sources, or they may find what is wanted in the Buyers' Index of the Textile World Journal.

The Carrier System

of Humidifying and Conditioning the Textile Mill HAS PROVEN SUPERIOR AND PROFITABLE in Nearly 200 of America's Finest Mills

Complete Humidifying and Conditioning Installations

Contractors for Process and
Power Piping in the Textile Mill

The Carrier System of conditioning provides the precise humidification best suited to each department, and, in addition, scientifically ventilates the building without permitting window drafts, controls the heat in the winter, and cools the building in the summer.

A Carrier installation is unique because it embodies Carrier Apparatus backed by Carrier Service. One is the perfect complement of the other. Both have been developed by sixteen years of constant research and practical experience.

Carrier presents, also, a unique business policy,—a guarantee of results. Not a specification of size or capacity of apparatus, but a guarantee that the installation as a whole, will produce the results for which it is designed.

You ought to read Bulletin 103-B.

It's yours for the asking.

WRITE RIGHT NOW.

DURIRON

(ACID-ALKALI-RUST-PROOF)

APPARATUS

Resisting both corrosion and erosion, Duriron "stands up" under the most exacting conditions, and, with ordinary treatment, should last a life-time. It is unaffected by Hypochlorite Solutions of Lime and Soda, as well as Iron Nitrate Solution and most Acids.

Because of these properties, Duriron is extensively used in the Textile Industry in the form of Cocks, Valves, Pipe and Fittings, Pumps, Pot-Eyes, Kettles, etc.

The high percentage of repeat-orders for Duriron is convincing evidence that this alloy gives the kind of service that is claimed for it.

Write for sample dish-make your own tests

Oilless Bearings

are made of wood chemically treated. They do away with oil, lost time, excessive depreciation, make a cleaner factory, and reduce fire risks.

They are adapted for loose pulleys, friction clutches, counter-shafts, fans, confectioners, electrical, harvesting, insulating paper-box, printing, shoe, spinning, textile, weaving and winding machinery.

Write us and find out just what they will do for you.

Perfect Soft Water Means a Perfect Product

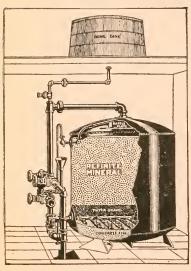

MILLS using water which they considered soft have found the Refinite Water Softener their most profitable investment.

In one instance the water was 1.8 grains. Refinite, bringing this water to no hardness, paid for the Softener in a few months in saving on soap alone!

Yet this economy is small compared with the results in the dyehouse. There is no more changing of formulas to meet changing conditions of the water, shading has been eliminated, seconds are practically unknown.

Refinite is a natural mineral. It softens by simple exchange of sodium for the calcium and magnesium present in the water. It's Nature's way,—dependable, perfect.

The Refinite Water Softener is the only one using the natural Refinite mineral. It is built in sizes to suit all needs. Quickly installed — occupies very little space—100% efficient.

It produces water of no hardness at the lowest cost of operation.

Our district engineers are at your service without expense or obligation. Write the office nearest you.

"SIGNODE SYSTEM"

Signode System makes possible using high tensile strength unannealed strap for tying bales and for reinforcing shipping boxes. In addition to the greater number of feet of a given strength to the pound, there is a saving in labor in the time of application.

Extensively used by large textile shippers and by the U. S. and allied governments.

A thoroughly posted salesman will call at your request and strap a trial shipment.

^{*} The number of mills given in this column is not always the total of the different kinds of mills listed in the previous columns, because where a mill manufactures more than one kind of goods (for example, cotton and silk fabrics) it would be reported in each of those columns separately, but would be counted as only one mill in the total column.

Wherever a shaft turns **Strom Bearings** are considered standard for every bearing use. They practically eliminate power-destroying friction, and so save fuel, prevent wear and tear on manufacturing equipment, reduce operation costs and stay in service over a long period of time with a minimum of attention.

U. S. Ball Bearing Mfg. Co.

RICE'S MILL WHITE The WHITE that remains white LONGEST

No one wishes to spend the money for painting the ceilings and walls of his plant with a white finish that turns yellow and therefore soon needs repainting.

"BARRELED SUNLIGHT"— Rice's Gloss Mill White—is the only OIL paint for plant interiors that gives a glossy, tile-like finish.

Repeated tests have shown without a single exception that Rice's remains white longer than any

It is made by a process over which we have exclusive control, and no one else Write for Booklet

"The Yellow Peril"

has any knowledge of the process or the right to use it.

This product which we originated differs from all the numerous imitations. The essential principle of the process enables us to avoid the use of Varnish, thus preventing cracking, and to also overcome the marked tendency to yellowing which is an invariable feature of the imitations.

There is no substitute for "Barreled Sunlight"—Rice's Gloss Mill White.

Users are protected by our Guarantee.

EXPLANATION OF MAPS AND GENERAL ARRANGEMENT.

The arrangement of the mill section of the Directory is first, alphabetieally by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, and the Provinces of Quebec and Ontario, showing the location of the textile mill cities and towns. These maps are engraved especially for the OFFICIAL AMERICAN TEXTILE DIRECTORY, and are arranged with special reference to the convenience of those desiring to reach the textile establishments. The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading at the top of right hand pages reference is made to the page of map for that State.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J .- "Passaie, D-9"; meaning that Passaie will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given and the distance from it.

The population of the place follows the railroad abbreviations.

EXPLANATION OF ABBREVIATIONS.

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill. i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:-

C means cotton mill.

J means jute mill.

W means woolen mill.
K means knitting mill.
D means dyeing establishment.
Pr means print works.

BI means bleachery.

FI means flax mill.

M means mercerizing.

Power. The kind of power is designated—steam, number of boilers; water, number of water wheels; electric, generate or buy.

W. W. means water wheels.

Dye. If the mill has dyeing facilities, the word "dye" is used.

Buyer. In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by indicated usually buy.

A Size for Every Need

(Built to Last a

A Size for Every Need (Bnilt to Last a Business Life-time)

IT'S QUICKER. CHEAPER AND BETTER: Worth more to your shipping clerk than 1/2 dozen assistants—yet you can own it for a few weeks' salary of one. No more customer complaints, losses or delays due to mistakes, insufficient marking, labels form or tags lost off in transit. Takes the drudgery out of shipping and reduces the work to mechanical case, speed and accuracy. The improved, commercial-like package appearance alone is worth more than the nominal cost of the DIAGRAPH. Made in the largest range of models and sizes. The larger exporters use the Jumbo DIAGRAPH because it ents 1-3/4// characters—much the largest cut by any other machine.

SIMPLICITY, SPEED AND ENDURANCE combined with new improved features not to be had in any other machine have made the DIAGRAPH famous everywhere for 17 years. This assures permanent satisfaction—likewise n broader and more useful range of necessary work thun is possible by any other construction. You cannot name the LEADERS IN THE TEXTILE OR ANY OTHER LEADING INDUSTRY anywhere without naming owners of DIAGRAPHS in quantities of from 1 to 100 or more machines. (Also hundreds used by U. S. and British Armies, Navies and other departments.)

The DIAGRAPH pays for itself. Simply ask us to send you one prepaid. Try it thoroughly. Buy it if you like it. Otherwise return it at our expense. You need a DIAGRAPH right now—why waif?

BEAUMONT

Standardized Boiler Houses

East Elevation, Beaumont Standard Boiler House, Highland Paper Mills, N. Y. & Pa. Co., Johnsonburg, Pa.

ONE CONTRACT—ONE RESPONSIBILITY. We take a contract for the boiler house complete—from the inception of the plans to the finished job delivered in operating order with steam in the pipes. No "passing the buck" from engineer to contractor or from boiler manufacturer to stoker builder. The equipment used is selected because of its reliability and adaptability to your requirements and the building is designed to fit this equipment—light, ventilation, architectural appearance, economy of operation and future extension all being provided for.

BEAUMONT PRE-CONSTRUCTION.—Standardization permits us to purchase in large quantities, and keep material in stock. It also dispenses with the usual months of planning and drafting. This results in a very large saving of both time and money over the old "tailormade" method.

A DEFINITE PRICE IN ADVANCE.—Frequent repetition of the same operation and lump sum purchasing places costs on a definite basis with all guess work eliminated.

WATER SOFTENERS

Will make the water you use, whether hard or relatively soft, "zerowater", ideal for every textile purpose. Your soap and dye consumption will drop to the limit. You'll get clear, bright, true uniform colors, with less dye. Perfect matching will be possible. You'll save the time and labor of re-dyeing. Returned goods will cease to be a serious consideration. Your clean boilers will save you coal. You'll experience a general "toning up" of all the processes in your plant. A better product, at less cost-that is what "Permutit" will give you. Write for a "Permutit" specialist to confer with

American Dyestuffs in 1919

THIS COMPANY was founded to provide America with a permanent dye-stuff industry. Its predecessors were the pioneers in American color production. The war brought not only the opportunity, but the necessity for the development of this accumulated experience. Upon this experience has been built a structure in personnel and in equipment not bettered by any European works.

The obligation resting upon us during the war was to produce quantity. The emergency needs of the Government and of the textile industry demanded first attention. The building of our immense plants had to go on hand in hand. To-day we are producing some 60 intermediate products and over 160 different colors. Type for type these products are as fine in quality as any ever imported.

Out of our Research Department must come the future progress of the Company. Its past years of steady upbuilding and devoted service will become evident as better and newer types advance into the semi-manufacturing, and ultimately to the full manufacturing scale of production. Several very important types to be available in 1919 have already been announced. We know the needs of the country by reason of years of service which our selling units have devoted to the textile industry, and the research which we undertake is dictated in the interest of the textile user.

Primarily and logically, the American coal-tar color industry is a servant of the great American textile manufacturers, whose annual product runs into the hundreds of millions. It is the needs of the great army of textile consumers that we serve. It is the voice of the textile manufacturer to whom we listen. It is because the great American investment in textile manufacture must be insured against loss for all time, that an American dye-stuff industry has been born to serve the Government with explosives for war, and with colors for textiles and allied industries in both peace and war.

National Aniline & Chemical Company

INCORPORATED

Main Sales Office: 21 Burling Slip, New York

NEW DEPARTURE BALL BEARINGS refine and improve textile machinery to a remarkable degree. A few of the advantages are:—

A cleaner product—no oil on the fabric, because of more efficient packing and enclosure.

Less attention necessary—need less oiling, a very important matter where bearings are inaccessible.

Power Saving—small on each spindle, but considerable in the aggregate—many H. P. a year per plant.

More rigid and accurate assembly—insuring a better and more uniform product.

THE UTSMAN QUILL CLEANING MACHINE

The cost of cleaning your filling bobbins can be very materially reduced with an Utsman.

It gives you more production with less labor than any other method of quill cleaning.

Built in two sizes—a single and a double-end. The single-end machine has a capacity of 40,000 bobbins per day of 10 hours; the double-end will handle 80,000 per day.

Automatic Loop Dryer

THE THE DIVE

Automatic Wool Dryer

Truck Yarn Dryer

4,000 In Operation

PROCTOR DRYERS

for:

Cotton
Wool
Worsted
Silk
Yarn
Toweling
Hosiery
Underwear
Rags
Tapes
Etc., etc.

The choice of a dryer always narrows down to a

PROCTOR.

RESPONSIBILITY

Is the drying operation a **responsible** part of your manufacturing process?

The dryer affects production costs most markedly by its control over capacity and output. Failure to get material properly dried hurts its quality. Failure to dry the material on time reduces the quantity. And, other departments are held up.

A responsible dryer gives continuous operation. It gives uniform results. It is economical. It maintains maximum capacity at minimum cost.

In such mills and plants where these features are responsible for efficiency and economy, there you will find Proctor Dryers.

Proctor Dryers are sold with an absolute guarantee. Backed by a service record of 35 years.

Write for a

Proctor Dryer Catalog for your material.
